

Tree and Shrub Care Plans

Understanding your trees and shrubs, how to care for them, and where to start are crucial steps in maintaining your property. Where to start and how to focus time and resources are both commonly asked questions. Our experts at Bartlett have devised a simple and easy-to-follow Tree and Shrub Care Plan to help you understand, prioritize, and budget for your property's landscape needs.

We start with a site visit and thorough evaluation by your qualified Bartlett Arborist. This evaluation helps us understand the tree and shrub species on the property.

A Tree and Shrub Care Plan is then created to provide you with a multi-year or phased plan that prioritizes immediate needs and intermediate and future recommendations. The plan also includes recommendations on specific soil or plant health care when observed issues affect tree condition or growth.

A planned approach creates a clear roadmap for maintaining your trees and shrubs' health and beauty. This approach also empowers you with the knowledge needed to make informed decisions about your trees and shrubs. Cost of care is always a concern, and good planning almost always leads to efficiency. Proactive management through this plan is a cost effective and practical approach that puts you in control. Whether you have a

residential, institutional, or commercial property, a Tree and Shrub Care Plan is an adaptable and custom plan that allows you to understand the needs of your trees and shrubs and how to budget for their care.
